

SANJANA DWIVEDI

Data Analyst | Python & SQL | NLP & ML Practitioner

✉ sanjanadwivedi574@gmail.com | ☎ +91-7834981102 | 📍 Delhi/NCR, India

PROFESSIONAL SUMMARY

Detail-oriented final-year Computer Science graduate (CGPA 8.86/10) with hands-on experience collecting, cleaning, and analysing data using Python, SQL, and ML libraries. Completed a production-level AI internship involving data preprocessing pipelines, iterative model evaluation, and analytical reporting. Proficient in identifying trends and patterns, building data visualisations, and communicating insights clearly to technical and non-technical stakeholders. Eager to contribute to Optimspace.in's data-driven projects and grow through real-world analytical challenges.

CORE COMPETENCIES

Python (Pandas/NumPy)	SQL & MySQL	Excel (Advanced)	Data Cleaning
Data Visualisation	Statistical Analysis	NLP & Text Analytics	ML Modelling
Power BI / Tableau	Report Writing	Trend Identification	Team Collaboration

INTERNSHIP EXPERIENCE

LLM & Chatbot Engineering Intern Bluehim Solutions

Summer 2025

- Built and maintained data preprocessing pipelines to collect, clean, and normalise raw datasets before feeding them into NLP models — directly mirrors the data collection and cleaning responsibilities of this role
- Conducted iterative evaluation and analysis of AI outputs, documented patterns and failure modes, and produced structured reports with actionable improvement recommendations
- Integrated real-time SQL databases with Python/Flask backend, writing and optimising queries to extract, transform, and load data for dynamic analysis
- Collaborated cross-functionally with the engineering team to communicate data findings and translate analytical insights into product improvements
- Maintained thorough documentation of pipelines, experiments, and results — enabling reproducibility and team-wide knowledge sharing

DATA & ANALYTICS PROJECTS

NLP Text Analytics Pipeline Academic Project

2024

- Collected and processed unstructured text datasets through a full cleaning pipeline — tokenisation, stop-word removal, and normalisation — transforming raw data into analysis-ready formats
- Engineered features using TF-IDF vectorisation and transformer-based embeddings; visualised data distributions, class imbalances, and model performance metrics using Matplotlib and Seaborn
- Benchmarked multiple classification models (Naive Bayes, Logistic Regression, transformers) and compiled comparative performance reports with precision, recall, and F1-score — the kind of insight-driven reporting Optimspace expects

ML Classification, Clustering & Feature Engineering Academic Project

2024

- Implemented supervised and unsupervised ML models using Scikit-learn; identified patterns and clusters in datasets using K-Means, decision trees, and logistic regression

- Built reusable Pandas/NumPy pipelines for missing value treatment, categorical encoding, and feature scaling — produced clean, structured datasets ready for analysis and visualisation
- Visualised findings through confusion matrices, ROC curves, and cross-validation plots; presented analytical insights in structured reports with clear trend identification

LLM-Powered Chatbot with Dynamic Database Integration

2025

Internship Project — Bluehim Solutions

- Designed and analysed data flows between live SQL databases and an LLM API backend; optimised query performance and data retrieval accuracy for real-time responses
- Authored detailed technical write-ups and presentation slides communicating system behaviour, data patterns, and performance metrics to the broader team

EDUCATION

B.Sc. (Hons.) Computer Science

2022 – 2026

Shaheed Rajguru College, University of Delhi | CGPA: 8.86/10

Coursework: Machine Learning · NLP · Data Science · Statistics · DBMS · Data Visualisation

TECHNICAL SKILLS

Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Excel (Advanced), Power BI, Tableau

ML & NLP: Scikit-learn, TF-IDF, Transformers, Embeddings, Text Classification, Sentiment Analysis

Databases: MySQL, SQL Server — querying, joins, aggregations, data extraction

Reporting & Viz: Matplotlib, Seaborn, Power BI, Tableau, Jupyter Notebook

Other Tools: Git, GitHub, Flask, VS Code, Docker (familiar)

ACHIEVEMENTS & LEADERSHIP

- Ranked 2nd in 3rd year & 3rd in 2nd year in the CS department — Academic Excellence
- Treasurer, CS Council (2024–25): Managed finances and led organisation of Tech Melange 2024, a college-wide technical festival — demonstrating strong collaboration and communication skills
- Member, Robotics Club (2023–24): Collaborated on hardware-software integration projects and inter-college competitions
- 1st Prize — Inter-College Aerobics Competition
